EXPERIENCE

Midwestern Interactive - iOS Developer | Joplin, MO

04/2022 – 08/2023

- Collaborated with a diverse team of Kotlin Developers, designers, and product managers to enhance user experience.
- Utilized UIKit to craft intuitive interfaces, focusing on seamless user interactions.
- Developed weather feature using Core Location and Restful Web Services, allowing users to customize information in Fahrenheit and Celsius while tracking locations.
- Fostered strong relationships with clients, upholding high standards and ensuring efficient project delivery.
- Spearheaded the integration of ChatGPT into the mobile app by building JavaScript-Swift web bridge.

PROJECTS

Music Goers — 4 person team

- Played a pivotal role in identifying and resolving critical code-related bugs, ensuring a seamless user experience.
- Proficiently used Firebase for storing user data, including login credentials, event details, locations, to-do lists, and messaging.
- Utilized Figma for visually appealing and user-friendly UI design.
- Implemented MapKit to facilitate easy location tracking of event venues, enhancing overall user experience.

LolBuilds — A solo project

- Solely responsible for comprehensive UI design across app views, prioritizing user-friendliness using both SwiftUI and Figma.
- Developed readable and reusable code while swiftly identifying and resolving various code-related bugs.
- Worked with multiple APIs to augment app functionality and integration.
